AHMAD

Full-Stack Software Engineer · Cybersecurity Specialist

Next.js · Node.js · Electron · Secure, scalable web & desktop apps

PROFESSIONAL SUMMARY

Full-Stack Engineer and Cybersecurity specialist (BSCS, 7th semester) who builds secure, production-grade web platforms and cross-platform desktop apps with **Next.js, TypeScript, React, Node.js, Electron** and **MongoDB / MySQL / PostgreSQL**. Ships live products end to end – freelancing marketplaces, earning platforms and social networks – with security-by-design (OWASP Top 10, hardened auth, RBAC) and polished, motion-rich interfaces using GSAP.

EXPERIENCE

Full-Stack Web Developer

DevArion Solution · 3 months · **Currently working**

- Building and maintaining full-stack web applications with React / Next.js, Node.js and SQL / NoSQL databases.
- Developing REST APIs, authentication flows and responsive, production-ready interfaces for client projects.
- Collaborating through Git-based workflows and deploying applications to live environments.

FEATURED PROJECTS

01 WorkingTrust — Freelancing Marketplace (Upwork-style)

workingtrust.online

Next.js · TypeScript · Node.js

- Full freelancing platform: freelancer profiles, subscription plans, connects system, bidding on projects and getting hired.
- Built in-platform messaging between clients and freelancers, project tracking and wallet-based payouts.

02 JTB Social — Facebook-style Social Network

jtbsocial.com

PHP · MySQL

- Complete social platform: profile management and security, stories, posts, reels, comments, likes, shares and reposts.
- Includes marketplace, groups and a real-time messenger.

03 EarnNova — Social Earning & Revenue Platform

earnnova.online

Next.js · Node.js

- Earning platform where users complete campaigns, grow USD balances with local-currency equivalents and manage membership access.
- Next.js frontend with a Node.js backend and account, balance and membership management.

04 GreenBus — Electric Bus Transit Management System

greenbus.online

React.js · Node.js · MongoDB / SQL · JWT + RBAC · Burp Suite

- Real-time scheduling, route optimisation and fleet tracking with a normalised, indexed schema for sub-second queries.
- Hardened against OWASP Top 10 (XSS, SQLi, broken auth) and secured with JWT + RBAC for commuter, driver and admin roles.
- Security-tested with Burp Suite and Wireshark before production deployment.
